Meeting Minutes #1

Date: 17/09/2025

Time: 16:30 – 18:00 (1h30)

Format: In Person

Attendees: Ramy, Sara, Patrick, Riyad, Adina, Ina, Bianca, Adnane

Key Discussion Points:

- *Project rundown description :*
  - What is the project about
  - Discussed the strength and preferred programming languages of each teammate
  - Confirm which dates are convenient for team meetings
- *Git :*
  - Understand the level of each team member using Git and GitHub
  - Making sure everyone understands how to "push" and "pull" to/from a branch
  - Creation of the repository and giving access to all team members
- *README.md file :*
  - Added information of team members (name, studentID, and GitHub username)
  - Wrote Objective, Description, and Technologies sections
  - Each team member created a commit to add their information and get hands on experience using git
  - To improve: Make the description a little longer as it currently lacks some context on the project description
- *Technologies:*
  - Agreed to use HTML, CSS and JavaScript for the project
  - Also agreed to use a relational database (MySQL or PostgreSQL)
- *New feature ideas:*
  - For You section (show events based on the user's preferences)
  - Waitlist functionality
  - Friends on app / inviting friends to events
  - Dynamic prices / Last minute discounts (the one we chose)

Next Meeting Agenda:

- User stories creation
- Create project on GitHub and assign tasks to each member
- Give priorities to each GitHub issue
- Decide on what each member will work on (frontend, backend)
